### Listing of Claims

The following listing of claims will replace all prior versions, and listings, of claims in the application.

1. (Currently amended) A method performed by a computer system, comprising:  
storing an electronic version of a paper, the electronic version being displayable on a display device as a likeness of the paper;  
at a first location within the electronic version, detecting a reference to a second location that is exclusive of the first location, wherein the detected reference at the first location is at least one of the following, other than a computer network address: an alphanumeric character; a symbol; a term; and a phrase; and  
in response to the detected reference at the first location, embedding a hyperlink within the detected reference at the first location, wherein the hyperlink is selectable by a user to cause displaying of the second location on the display device instead of the first location on the display device an operation associated with the second location, and wherein the first and second locations are exclusive of one another.
2. (Previously presented) The method of Claim 1 and comprising:  
on the display device, displaying a first selector associated with a first portion of the paper;  
on the display device, displaying a second selector associated with a second portion of the paper; and  
on the display device, displaying a likeness of the first portion in response to a selection of the first selector.
3. (Canceled).
4. (Canceled).

5. (Previously presented) The method of Claim 1 and comprising:  
on the display device, in response to a user command, performing a pan function on the likeness of the paper.
6. (Previously presented) The method of Claim 1 and comprising:  
on the display device, in response to a user command, performing a zoom function on the likeness of the paper.
7. (Previously presented) The method of Claim 1 and comprising:  
in response to a selection of a portion of the electronic version, displaying the portion on the display device as a likeness of the paper in an enlarged format.
8. (Previously presented) The method of Claim 1, wherein the detected reference is highlighted to indicate the hyperlink .
9. (Currently amended) A system, comprising:  
a computing device for:  
storing an electronic version of a paper, the electronic version being displayable on a display device as a likeness of the paper;  
at a first location within the electronic version, detecting a reference to a second location that is exclusive of the first location, wherein the detected reference at the first location is at least one of the following, other than a computer network address:  
an alphanumeric character; a symbol; a term; and a phrase; and  
in response to the detected reference at the first location, embedding a hyperlink within the detected reference at the first location, wherein the hyperlink is selectable by a user to cause displaying of the second location on the display device instead of the first location on the display device ~~an operation associated with the second location, and wherein the first and second locations are exclusive of one another.~~

10. (Previously presented) The system of Claim 9 wherein the computing device is for:

on the display device, displaying a first selector associated with a first portion of the paper;

on the display device, displaying a second selector associated with a second portion of the paper; and

on the display device, displaying a likeness of the first portion in response to a selection of the first selector.

11. (Canceled).

12. (Canceled).

13. (Previously presented) The system of Claim 9 wherein the computing device is for:

on the display device, in response to a user command, performing a pan function on the likeness of the paper.

14. (Previously presented) The system of Claim 9 wherein the computing device is for:

on the display device, in response to a user command, performing a zoom function on the likeness of the paper.

15. (Previously presented) The system of Claim 9 wherein the computing device is for:

in response to a selection of a portion of the electronic version, displaying the portion on the display device as a likeness of the paper in an enlarged format.

16. (Previously presented) The system of Claim 9, wherein the detected reference is highlighted to indicate the hyperlink .

17. (Currently amended) A computer program product, comprising:  
a computer program processable by a computer system for causing the computer system  
to:

store an electronic version of a paper, the electronic version being displayable on  
a display device as a likeness of the paper;  
at a first location within the electronic version, detect a reference to a second  
location that is exclusive of the first location, wherein the detected  
reference at the first location is at least one of the following, other than a  
computer network address: an alphanumeric character; a symbol; a term;  
and a phrase; and  
in response to the detected reference at the first location, embed a hyperlink  
within the detected reference at the first location, wherein the hyperlink is  
selectable by a user to cause displaying of the second location on the  
display device instead of the first location on the display device ~~an~~  
~~operation associated with the second location, and wherein the first and~~  
~~second locations are exclusive of one another;~~ and  
apparatus from which the computer program is accessible by the computer system.

18. (Previously presented) The computer program product of Claim 17 wherein the  
computer program is processable by the computer system for causing the computer system to:  
on the display device, display a first selector associated with a first portion of the paper;  
on the display device, display a second selector associated with a second portion of the  
paper; and  
on the display device, display a likeness of the first portion in response to a selection of  
the first selector.

21. (Previously presented) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:  
on the display device, in response to a user command, perform a pan function on the likeness of the paper.
22. (Previously presented) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:  
on the display device, in response to a user command, perform a zoom function on the likeness of the paper.
23. (Previously presented) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:  
in response to a selection of a portion of the electronic version, display the portion on the display device as a likeness of the paper in an enlarged format.
24. (Previously presented) The computer program product of Claim 17, wherein the detected reference is highlighted to indicate the hyperlink.
25. (Previously presented) The method of Claim 1, wherein the second location is located within the electronic version.
26. (Previously presented) The method of Claim 25, wherein the detected reference includes a page number of the second location.
27. (Cancelled).
28. (Previously presented) The method of Claim 1:  
translating a first version of the paper into the electronic version.

29. (Previously presented) The method of Claim 1, and comprising:  
forming a link table in the electronic version; and  
in the link table, storing information associated with the hyperlink.
30. (Previously presented) The method of Claim 8, wherein the detected reference is  
highlighted by an indicator to indicate the hyperlink, and comprising:  
in response to a user command, selecting a type of the indicator.
31. (Previously presented) The system of Claim 9, wherein the second location is  
located within the electronic version.
32. (Previously presented) The system of Claim 31, wherein the detected reference  
includes a page number of the second location.
33. (Cancelled).
34. (Previously presented) The system of Claim 9, wherein the electronic version is a  
second electronic version of the paper, and wherein the computing device is for translating a first  
electronic version of the paper into the second electronic version.
35. (Previously presented) The system of Claim 9, wherein the computing device is  
for:  
forming a link table in the electronic version; and  
in the link table, storing information associated with the hyperlink.
36. (Previously presented) The system of Claim 16, wherein the detected reference is  
highlighted by an indicator to indicate the hyperlink, and wherein the computing device is for:  
in response to a user command, selecting a type of the indicator.
37. (Previously presented) The computer program product of Claim 17, wherein the  
second location is located within the electronic version.

38. (Previously presented) The computer program product of Claim 37, wherein the detected reference includes a page number of the second location.

39. (Cancelled).

40. (Previously presented) The computer program product of Claim 17, wherein the electronic version is a second electronic version of the paper, and wherein the computer program is processable by the computer system for causing the computer system to:  
translate a first electronic version of the paper into the second electronic version.

41. (Previously presented) The computer program product of Claim 17, wherein the computer program is processable by the computer system for causing the computer system to:  
form a link table in the electronic version; and  
in the link table, store information associated with the hyperlink.

42. (Previously presented) The computer program product of Claim 24, wherein the detected reference is highlighted by an indicator to indicate the hyperlink, and wherein the computer program is processable by the computer system for causing the computer system to:  
in response to a user command, select a type of the indicator.

43. (Currently amended) A method performed by a computer system, comprising:  
storing an electronic version of a paper, the electronic version being displayable on a display device as a likeness of the paper;  
at a first location within the electronic version, detecting a reference to a second location that is exclusive of the first location within the electronic version, wherein the detected reference at the first location includes a page number of the second location; and  
in response to the detected reference at the first location, embedding a hyperlink within the detected reference at the first location, wherein the hyperlink is selectable by a user to cause displaying of the second location on the display device instead of the first location on the display device, and wherein ~~the first and second locations are exclusive of one another.~~

44. (Currently amended) A system, comprising:  
a computing device for:  
storing an electronic version of a paper, the electronic version being displayable on a  
display device as a likeness of the paper;  
at a first location within the electronic version, detecting a reference to a second location  
that is exclusive of the first location within the electronic version, wherein the  
detected reference at the first location includes a page number of the second  
location; and  
in response to the detected reference at the first location, embedding a hyperlink within  
the detected reference at the first location, wherein the hyperlink is selectable by a  
user to cause displaying of the second location on the display device instead of the  
first location on the display device, ~~and wherein the first and second locations are~~  
~~exclusive of one another.~~

45. (Currently amended) A computer program product, comprising:  
a computer program processable by a computer system for causing the computer system  
to:  
store an electronic version of a paper, the electronic version being displayable on  
a display device as a likeness of the paper;  
at a first location within the electronic version, detect a reference to a second  
location that is exclusive of the first location within the electronic version,  
wherein the detected reference at the first location includes a page number  
of the second location; and  
in response to the detected reference at the first location, embed a hyperlink  
within the detected reference at the first location, wherein the hyperlink is  
selectable by a user to cause displaying of the second location on the  
display device instead of the first location on the display device, ~~and~~  
~~wherein the first and second locations are exclusive of one another~~; and  
apparatus from which the computer program is accessible by the computer system.

46. (Previously presented) The method of Claim 1 and comprising:  
receiving a watch list term;  
searching the version for the watch list term; and  
displaying a result of the searching.
47. (Previously presented) The method of Claim 46 and comprising:  
in response to a selection of the result, displaying a likeness of a portion of the paper  
associated with the selected result on the display device.
48. (Previously presented) The system of Claim 9 wherein the computing device is  
for:  
receiving a watch list term;  
searching the version for the watch list term; and  
displaying a result of the searching.
49. (Previously presented) The system of Claim 48 wherein the computing device is  
for:  
in response to a selection of the result, displaying a likeness of a portion of the  
paper associated with the selected result on the display device.
50. (Previously presented) The computer program product of Claim 17 wherein the  
computer program is processable by the computer system for causing the computer system to:  
receive a watch list term;  
search the version for the watch list term; and  
display a result of the searching.
51. (Previously presented) The computer program product of Claim 50 wherein the  
computer program is processable by the computer system for causing the computer system to:  
in response to a selection of the result, display a likeness of a portion of the paper  
associated with the selected result on the display device.
